

THE PROBLEMS WITH COALESCING PLATE PACKS CLEANING & MAINTENANCE

- Many customers buy an oily water separator only on capital price
- But then they are hit with the nasty surprise of...

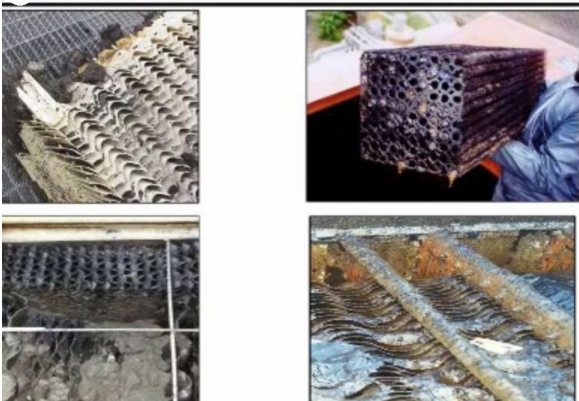

...having to constantly spend time, money and effort just to keep it operational!

Still not convinced that a plate pack is going to give you headaches?

Take a look at what a leading US plate pack vendor has to say...

OIL + SOLIDS + TIME =

Even within the plate pack industry, it is widely known and accepted that cleaning is an expensive hassle!

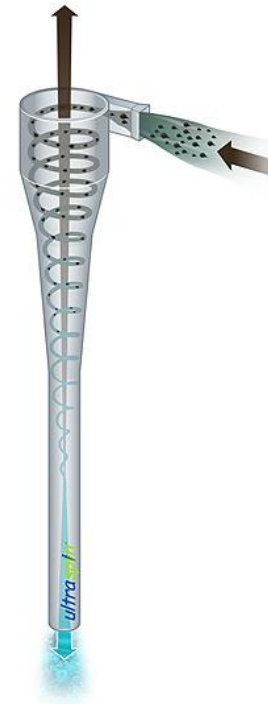

**THE ULTRASPIN SOLUTION
THE BETTER WAY!**

- **DON'T WASTE TIME CLEANING**
- **REDUCED MAINTENANCE COSTS \$**
- **LOWEST TOTAL COST \$**

The Ultraspin separator is shaped like a tapered piece of pipe. There is nothing to clean! And performance does not deteriorate due to sludge.

Ultraspin customers tell us a primary reason they purchased our systems is to lower their total costs \$ and reduce the maintenance and cleaning problems with plate packs.

\$\$	ULTRASPIN	PLATE PACKS
Cleaning Frequency	✓ Typically 3 to 6 monthly	✗ At least every 3 months; sometimes every week
How long does cleaning take?	✓ A few minutes	✗ Typically 4 hours for small systems; up to several days for larger systems
Special Equipment Needed?	✓ None	✗ Requires heaving lifting, cranes may be required, a cleaning pad, waste disposal, tools to disassemble plate packs, special cleaning wands
Manpower	✓ 1 person	✗ At least 2 people
What happens if I don't clean it?	✓ Usually nothing. Periodically empty the strainer basket	✗ It stops working! Dirty plate must be cleaned to work again.
