## AIR-SAN AEROSOL

A synergistic blend of novel disinfectants, alcohol and fragrances that helps to control airborne bacteria and viruses. This standard aerosol contains 95% alcohol.

## AIR-SAN FOGGER

A synergistic blend of novel disinfectants, alcohol and fragrances that helps to control airborne bacteria and viruses. This standard aerosol contains 95% alcohol.

## PRO-FOGGER DISINFECTANT UNIT

This compact mobile unit generates a disinfectant fog spray for quick and easy sanitation and decontamination inside and outside of mines, offices, warehouses, retail shops, hospitals, and vehicles. It is made from lightweight material for easy operation and optimum manoeuvrability. The unit is fully constructed in South Africa and ideal for all fogging applications, and its compressor is oil-free and operates silently. **The Pro-Fogger Disinfection Unit can be directly purchased from Procon, and is also used when you utilise Procon's convenient on-premises disinfectant service.**

## FOG UNIT DISINFECTANT TUNNEL

This compact tunnel generates a disinfectant fog for quick and easy sanitation and decontamination of people and items at entrances and exits of mines, buildings and shops. The disinfectant is automatically sprayed when a person walks through. Fog allows for full surface decontamination. Made from lightweight and durable material for easy assembly and operation.

## HAND-SAN

Instant hand and arm sanitiser with a refreshing scent. Contains 70% alcohol, moisturiser (emollients) and vitamin C. This product will not dry out the skin, and eliminates 99.5% of cross-contamination microorganisms.

## HAND-SAN AEROSOL

Instant hand and arm sanitiser with a refreshing scent. Contains 70% alcohol, moisturiser (emollients) and vitamin C. This product will not dry out the skin, and eliminates 99.5% of cross-contamination microorganisms.

## OPTIMUS CARE HAND AND SURFACE SANITISER

Alcohol-free, safe, and versatile biodegradable sanitiser, containing only food-safe ingredients. Ideal for use as a one-step cleaner and sanitiser for hands and hard surfaces.

## OXY-CLEAN

Active oxygen-fortified drain cleaner and maintainer for the elimination and control of microorganisms. Eliminates organic odours and dissolves hydrocarbons, including grease, oils, and fats. 100% biodegradable.

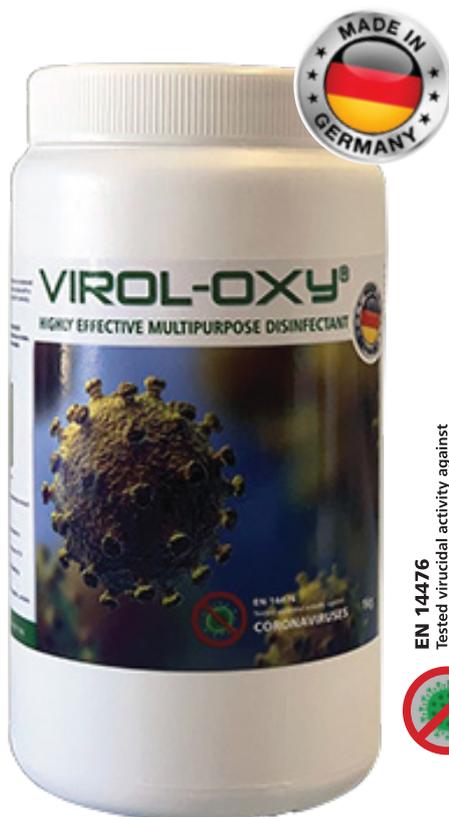

## STERI STAND

The Steri Stand is a foot-operated hand sanitiser stand. It is sturdy, easy to use and fully adjustable for various bottle types.

## SURFACE-SAN

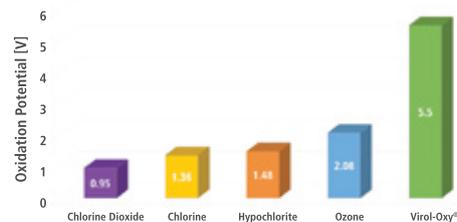

Instant surface sanitiser with a refreshing scent. Contains 70% alcohol, and eliminates 99.5% of cross-contamination microorganisms.

### OXIDATION POTENTIAL COMPARISON

## VIROL-OXY®

HIGHLY EFFECTIVE MULTIPURPOSE DISINFECTANT

Residential and commercial buildings disinfected with Virol-Oxy® during the coronavirus outbreak can now feel comfortable and easy, as a self-disinfecting and cleaning coating lasts for a minimum of ONE month inside the building and THREE months outdoors. Virol-Oxy® has been applied in almost every country affected by coronavirus.

The unique coating, called TiO2 crystalline powder, kills bacteria, viruses, and fungi upon contact, and remains on surfaces even with repeated scrubbing and cleaning, as strong sulfate bonding agents help it to adhere tightly to surfaces at a molecular level.
